Apex Nexus

OFFERINGS · HONG KONG

Practical AI tools that give small businesses time back.

Two ready-to-use solutions, built in Hong Kong for Hong Kong businesses, each already running in daily use. You see a working version within two weeks, before committing to more.

OFFERING 01

Custom AI Assistant

A branded AI assistant that knows your content and speaks like you, so clients get a helpful answer at any hour, in Cantonese, English or Chinese.

WHAT YOU GET

- **Built on your own content:** handbooks, FAQs, guides, books or policies. It answers only from what you approve.
- **Your voice:** tone and style designed with you, from warm and caring to crisp and professional.
- **Safety guardrails:** clear limits, and hand-off to a person or hotline for urgent or sensitive cases.
- **Cost control:** daily and monthly caps, so running costs never surprise you.
- **Shareable website** on your own domain, with built-in feedback.

ADD-ONS

- Voice input · branded avatar · usage reports · different answers for clients, family or staff

> **In use: BiG Buddy.** A Cantonese AI companion for people going through chemotherapy and their carers, built from one patient's own diary and book. It answers with warmth in her voice and points people to support hotlines when a conversation turns serious.

Best for: clinics, trainers, community and wellness groups, professional services

Typical launch: 3–6 weeks

OFFERING 02

Smart Receipt & Expense Capture

Snap a receipt, drop it in a folder, and it becomes a checked, tax-ready entry in your books, with the original filed by tax year.

HOW IT WORKS

1. **Capture:** photo, scan or PDF into one Google Drive folder, straight from your phone.
2. **Read:** AI picks out date, vendor, amount, currency and payment method, in Chinese or English.
3. **Record:** a new line in your ledger (Notion or Google Sheets), receipt attached, category suggested.
4. **File:** the original is renamed and moved to the right tax-year folder, as your 7-year backup.
5. **Review:** about 5 minutes a week to check and confirm.

WHAT YOU GET

- **HK tax-ready:** by Year of Assessment (1 Apr–31 Mar), with deductible and capital items shown separately.
- **Smart checks:** flags meals with no business purpose, unclear totals and likely personal items.
- **Foreign currency** converted to HKD at the day's rate.
- **Weekly autopilot,** or on demand before a deadline.

Best for: sole proprietors, freelancers, consultants, small teams

Typical launch: 1–2 weeks

HOW WE WORK

01
Discovery
Free 30–45 minute call on how you work today and where time is lost.

02
Prototype
A working version on your real content or receipts in 1–2 weeks.

03
Launch
Refined from your feedback, with guardrails, cost limits and simple instructions.

04
Ongoing care
Optional monthly plan: monitoring, updates and support.

YOUR DATA STAYS YOURS

Your accounts: content, ledgers and receipts stay in your own Google Drive, Notion or website account. **Business-grade AI:** for client work we recommend paid AI services that don't train on your data. **You approve** before anything goes live. **Pricing:** a one-off setup fee plus an optional monthly care plan, quoted after the free discovery call.
